
MARKET RELEASE

28 June 2010

ROCKLANDS GROUP COPPER PROJECT
RESOURCE UPDATE

The upcoming resource upgrade may include a Global Resource if time permits. The Company had advised shareholders that drilling was designed to upgrade the category at Central Las Minerale and Southern Rocklands from Inferred Resource. The geological data is being calculated. It now appears, that in addition to the category upgrade of these two prospects, a Global Resource, which incorporates all of the drilling at Rocklands, may accompany the upgrade.

The new Resource Statement is expected to be completed and delivered in the coming weeks.

Drilling and exploration is continuing.

Yours faithfully

Wayne McCrae
Chairman
